## **FOR IMMEDIATE RELEASE**

**March 23, 2017**

**WHILE OTHERS MEET THE STANDARD...  
... LONSEAL<sup>®</sup> FLIES ABOVE IT.**

### **Introducing Lonseal's Aircraft Flooring Collection**

As a leader in resilient vinyl flooring, Lonseal<sup>®</sup> has been providing the aviation industry with unparalleled products and service for over 45 years. We modified many of our existing specialty flooring products to meet all applicable safety and performance aircraft requirements. The LONSEAL<sup>®</sup> AIRCRAFT FLOORING COLLECTION is an assembly of our most popular products specifically geared for aircraft use. Some of the features you will find in the collection are additional new colors, 6 & 8 foot wide roll availability, low VOC and REACH compliant. All product lines in the collections meet FAR 25.853a and FAR 25.793. Our Loncoin II Featherweight meets Boeing D643A504.

Lonseal<sup>®</sup> became a leader in the aviation industry when we rose above the standards and launched our FEATHERWEIGHT formulation, which is more than 30% lighter than standard NTF aircraft products. Our material's light weight and our high strength-to-weight ratio are most often specified by many aircraft designers and airplane manufacturers. Lonseal's aircraft construction is specifically designed to support the increasing demands of today's aircraft industry.

LONSEAL<sup>®</sup> AIRCRAFT FLOORING COLLECTION is currently in production and will be available June 2017. Our distinctive selection of embossed and smooth designs comes in four collections: AXIS, CIRRUS, HALO, and MIRAGE.

## AXIS COLLECTION

Axis is an embossed product collection featuring differently scaled coin-stampings that provide a variety of choice in terms of color and design options as well as outstanding traction which aids in reducing the risk of slipping. The Axis collection consists of:

- LONCOIN II FEATHERWEIGHT
- LONPOLARIS
- LONCOMPASS
- LONEQUATOR.

### AXIS COLLECTION

**CIRRUS COLLECTION**

A variety of intriguingly realistic wood looks comprise the Cirrus Collection, from the realistic planking of LONVIRGA to the more stylized grain designs of the LONMISTRAL lines.

## HALO COLLECTION

The Halo Collection consists of products with a formulation of 50% recycled content that features a technology exclusive to Lonseal that reduces VOC emissions and contributes to superior indoor air quality.

## MIRAGE COLLECTION

The Mirage Collection features a weave design that gives a classic, stylish touch to any aircraft space. An abstracted take on a fabric look, Lonstratus' hue variations and slightly stubbed texture provide a sense of strength and durability.
