LONECO® WITH TOPSEAL

From recycled vinyl and wood powder, comes Lonseal's latest offering in environmentally-friendly flooring: **Loneco®**. This remarkable resilient sheet vinyl product offers the earthy visual appeal of cork in elegant colorways — making it perfect for health care, school/childcare, restaurant, retail outlet and office applications. Crafted from an average of over 50% recycled materials, Loneco® is GreenAir-formulated and FloorScore™-certified for low VOCs. From an eco-friendly standpoint, it also outperforms other floors such as linoleum in U.S. government tests for indoor air quality and for manufacturing resource/fuel conservation while maintaining a lower life-cycle cost.

Loneco® features **Topseal**, Lonseal's factory-applied urethane finish that protects the floor and simplifies routine maintenance. Topseal is applied in a 30-micron wear layer and extends the life of the flooring by protecting it from wear due to staining, soiling and scuffing.

PRODUCT HIGHLIGHTS

- Composed of an average of 50% post-industrial recycled vinyl and wood powder to reduce its impact on the environment through the use of renewable materials and enhanced-sustainability production modes.
- FloorScore™-Certified. Superior Indoor Air Quality (IAQ) measurements versus linoleum according to U.S. Commerce Department tests.
- Has lower life cycle costs, longer durability and superior manufacturing resource/fuel conservation results than linoleum according to the Commerce Department tests — making it a “Greener” flooring solution.
- A thick and clear wear-layer protects the materials and color against moisture, wear or fading, while its sheet production allows seam-welding which facilitates sterile floor installations.
- Color range includes subtly speckled earth tones and inviting, soothing hues.
