ABOUT LONSEAL®: “The Little Giant”

Celebrating over 50 years of durability and performance in a variety of commercial industries, Lonseal® offers a unique selection of resilient sheet vinyl flooring in exterior and interior, embossed, smooth, fitness and wood-grain surfaces. We provide finishes of exceptional beauty and utility which are as economical as they are exhilarating. Servicing a range of commercial applications including healthcare, education, fitness, corporate, retail, and hospitality, Lonseal’s products are specified through architects and designers nationwide.

COMPANY HISTORY:

Lonseal, Inc. is a subsidiary of Lonseal Corporation in Tokyo and was established in Southern California in 1972. The company quickly established itself as a provider of unique flooring designs with distinctive color choices. In the early 80’s, Lonplate (page 10) — the original steel-plate design adapted to resilient flooring — put Lonseal on the map as a creator of innovative, embossed products. Additionally, Lonseal’s technological advances bolstered the company’s reputation as it infused products with pliable properties not typically associated with vinyl.

Lonseal is known as “the little giant” in the resilient sheet vinyl flooring industry. Our corporate sales office in Carson, California, has a team with an average of 35 years of sheet vinyl experience! Our product line is most often specified by designers and architects because we focus on making one thing ... products that will over-deliver quality. Not only does our flooring exceed expectations, Lonseal products can easily customize products to meet our clients’ needs.

EXCLUSIVE LONSEAL® FORMULATIONS

For over 21 years, Lonseal Corporation has proudly been certified to be in conformance with JIS Q 9001 (equivalent to AS9100), the International Quality Assurance Standard. Since inception, the company has adhered to the highest level of manufacturing and safety standards in the industry.

Additionally, Lonseal has long been a leader in eco-friendly manufacturing as evidenced by our GreenAir® Collection for low VOCs, our exclusive GreenMedic® anti-microbial formulation to protect the flooring from degradation, and FloorScore® certified products which support Indoor Air Quality (IAQ). *See our GreenVinyl story on page 36.*

Lonseal pushes the limits of conventional vinyl, leading the sheet vinyl flooring industry in exciting new directions through technological, visual, and textured innovations. Our inspiration comes from the environment in which we live. We create transitional designs that combine the best of traditional and contemporary compositions to create a classic look that never goes out of style. Our goal is to connect interior environments with the rest of humanity. We take an intellectual approach and invest our time in researching the right flooring designs for various interior environments. We design patterns that balances function with beneficial effects to create a ... **FLOORING REIMAGINED.**

WHAT IS TOPSEAL?

TOPSEAL IS...

- A factory-applied urethane finish that creates a “no-wax” floor. It protects, reduces scuffing and simplifies routine maintenance. It is now available as standard on Lonseal’s most popular smooth and wood grain products.
- Applied as a surface coating extends the life of the flooring by protecting it from wear due to staining and soiling.
- An eco-friendly formulation that incorporates Lonseal’s GreenAir® technology for low VOCs, as well as GreenMedic® anti-microbial formulation to protect the flooring from degradation.
- Included in select Lonseal flooring products for commercial industries. All flooring products with the Topseal finish are FloorScore® certified.
- Saves time on maintenance, saves money on life-cycle costs, and saves the environment.

Loneco Linen Topseal
EL334 Wheat and EL333 Ash

LONSEAL’S TOPSEAL COLLECTION

E7216 MINT

LONECO®

Loneco® is comprised of recycled content and features elegant organic colors that easily conceal scuffing and soiling. Loneco® has been utilized in such diverse commercial spaces as Evergreen Hospital in Washington and Volkswagen dealerships nationwide.

EL331 OATMEAL

LONECO® LINEN

Loneco® Linen features a loose woven design that gives a classic, fashionable touch to any interior space. An abstracted take on a fabric look, Loneco Linen suggests the delicacy of cloth while its hue variations and slightly pebbled texture provide strength and durability.

F7264 BRASS

LONFLOOR® GALVANIZED

Lonfloor® Galvanized Topseal lends a striking industrial touch to any interior, from office break rooms to retail spaces. The subtle color choices offer warmth while the metallic design gives a polished, sophisticated appeal — particularly evident in the lustrous color, Brass!

LONMOIRE®

Lonmoire® features a wood-grain pattern that has the characteristics of watery waves of lines. This ripple design that was once coveted by queens, distinguishes the centuries-old, timeless pattern that now gives everyday commercial applications a genteel touch. PHTHALATE FREE

LONSPECK®

Lonspeck's pattern was designed with the right combination of speck size and sparsity to enhance spatial resolution for a better field of view. The Lonspeck pattern can help hide wear and tear, as well as conceal blemishes. This pattern adds detail to a room and brings character to an overall design.

LONSTRAND

Lonstrand mimics a bark of a tree, which is harmonious with the earth and offers a sense of healing and tranquility. Lonstrand has multiple design purpose. It is subtle enough to provide a smooth transition between rooms and interesting enough to help emphasize a focal point. PHTHALATE FREE

LONWOOD® DAKOTA

This durable, slightly textured sheet evokes the open grain of oak and the nuance of knot-free plank in warm and inviting colors. Lonwood® Dakota coordinates beautifully with Loneco® and is ideal for corporate and retail, as well as healthcare environments.

LONWOOD® MADERA

A wide-plank design, Lonwood® Madera features detailed graining that elegantly weaves around beautifully-rendered knotting. This extraordinarily realistic look is further enhanced by articulated plank lines resulting in a design that suggests the strength of old-world craftsmanship.

LONWOOD® NATURAL

Lonwood® Natural has a realistic maple wood image with striking color schemes taken directly from nature. It provides a room with a timeless design with soft grain patterning. Lonwood Natural has been a regular feature in healthcare, multi-family housing, and corporate settings.

LONZEBRA

The exciting pattern of African Zebrawood comes to life in Lonseal's Lonzebra collection, featuring a striated linear pattern that is not only visually extraordinary but also serves to mask dirt and other blemishes. Lonzebra offers clean and simple lines with a warm undertone.

Lonwood Natural #W7464 Summer Night & #W7459 Bark Dust
The Women's Center at Rockford Health System, Rockford, IL

Lonwood Natural #W7462 Gentle Wind & #W7466 Babbling Creek
Ocean Medical Pediatric Center, Brick, NJ

Lonzebra #LZ7068 African Sunset
ASB Bank Services, New Zealand

One of Lonseal's most striking offerings, LONBEAD® is a luxuriously textured surface consisting of an embossing of small bead-like drops that form a richly glossy and elegant design. The opulent color palette is timelessly chic and has enlivened numerous display, retail and hospitality spaces.

LONBEAD®

SMOOTH

As Lonseal's foremost eco-friendly product, LONECO® TOPSEAL is composed of recycled content and features Lonseal's exclusive GreenAir® technology that reduces VOC emissions and contributes to superior indoor air quality. Additionally, Loneco's organic and earthy colors easily conceal scuffing and soil. Loneco® comes standard with Lonseal's exclusive Topseal formulation, a factory-applied urethane finish that protects the floor, reduces scuffing and simplifies routine maintenance. See page 3 for more information on Topseal.

LONSPECK® TOPSEAL is a traditional blend of contrasting colors that adds interest and dimension, while the speckling design helps mask daily wear and tear commercial flooring endures. In addition to black and gray, the specks appear against tan, beige and cream backgrounds, as well as “new neutrals” pale yellow and a shade of blue. A flexible option in commercial spaces including healthcare and education facilities. Lonspeck also features Lonspeck’s exclusive Topseal formulation. See page 3 for more information on Topseal.

LONSTRAND TOPSEAL mimics a bark of a tree, which gives a harmonious relationship with the earth and offers a sense of healing and tranquility. The long, fibrous-like strands can visually expand a space. Lonstrand has multiple design purpose. It is subtle enough to provide a smooth transition between rooms and interesting enough to help emphasize a focal point. Lonstrand is PHTHALATE FREE and also features Lonseal's exclusive Topseal formulation. See page 3 for more information on Topseal.

LONWOOD® DAKOTA TOPSEAL is a slightly textured sheet that evokes the open grain of oak and the nuance of knot-free, quarter-sawn plank. Ideal for corporate, healthcare, retail and hospitality applications. Lonwood Dakota comes standard with Lonseal's exclusive Topseal formulation. See page 3 for more information on Topseal.

This product contains partial "boards" at both edges. This selvage should be removed to assure an aesthetically pleasing transition from sheet to sheet. The selvage width can vary depending on the lot.

LONCOURT® I is specifically designed for interior sport facilities where outstanding resilience, durability and low maintenance are desired. It boasts sound-absorbing construction, simple installation and ease of maintenance, and is excellent for interior gymnasium, multi-purpose fitness room environments, commercial and institutional use. Loncourt I also meets all NCAA requirements for bounce, can hold up to the impact of retractable bleachers, and accepts painted game lines and graphics.

As an environmentally-conscious manufacturer, Lonseal provides the most functional, beautiful, sustainable, and high-performance products available.

Lonseal has been distributing resilient sheet flooring in the United States since 1972. Our flooring is among the most visually striking and distinctive in the market. Lonseal has a number of eco-friendly features such as a pre-applied urethane finish, Topseal. This finish reduces maintenance efforts. It also adds durability and product longevity that far exceeds most other flooring options.

The GreenAir® Collection is Lonseal's suite of low VOC and FloorScore® certified resilient sheet flooring products which support Indoor Air Quality (IAQ). Along with the exciting development of low VOC vinyl flooring, Lonseal is continuously exploring new methods and technologies to minimize impact on the environment.

Among Lonseal's GreenVinyl features:

- Lonseal's interior flooring products contribute towards LEEDv4.1 Building Product Disclosure and Optimization:
 - **Environmental Product Declarations (Option 1)**. This qualifies our materials and sources with industry-wide EPD.
 - **Sourcing of Raw Materials (Option 2)**, which means our products meets the post-industrial recycled content that ranges from 10-20% (some Lonseal products exceed this requirement and fall within 25%-50%, such as the Loneco Topseal).
- All of our interior flooring products and our adhesive products have the **Indoor Environmental Quality Credit**. This credit shows that we met the General Emissions Evaluation and VOC content requirements.
- Lonseal obtains its flooring product from a facility that has certifications from the ISO (International Organization for Standardization): **ISO 9001 Quality Management Systems** and **ISO 14001 Environmental Management Systems**. ISO is a rigorous external third-party verification process that ensures Lonseal's compliance to its own internal standards and to ever-changing environmental laws and regulations.
- The GreenAir® Collection features products that are low VOC-emitting.
- Our GreenMedic® is a formulation to inhibit the growth of bacteria that may affect the flooring. *Please note that properties do not protect users or others against bacteria, viruses, germs, and other disease organisms.*
- We have FloorScore® certification from the Resilient Floor Covering Institute (RFCI) and **Scientific Certification Systems** which independently test and certify flooring products for compliance with indoor air quality emission requirements.
- Lonseal is a member of and meets the standards for the **Collaborative for High Performance Schools (CHPS)**. CHPS is a green building rating program especially designed for schools.

While resilient flooring manufacturers have made great progress in recent years, Lonseal is never satisfied with the status quo. We are always striving to raise the green bar with ever-more eco-friendly products with the development of our GreenVinyl formulations.

We have also greatly increased our use of recycled pre-consumer (post-industrial) content. We have also introduced a range of products with Topseal, a UV-cured, factory-applied, urethane-finish. Due to their low-maintenance and matte finish, products with Topseal reduce the use of chemicals from finishes and strippers.

There will always be more to come. Lonseal continues to explore new production technologies and formulation methods in order to create the most eco-friendly flooring options for commercial industries.

LONSEAL'S GREENVINYL STORY

BENEFITS OF LONSEAL® SHEET VINYL FLOORING

Lonseal specializes in resilient sheet vinyl flooring, with products available in a wide variety of colors, styles, and patterns. Its durability, practicality, and value have made it a popular choice in multiple types of applications for many decades.

WHY VINYL? Vinyl is an extremely versatile component. When used in flooring products, specifically in sheet goods, it creates flexible yet durable flooring. Additionally, vinyl is environmentally friendly. Its primary raw material is obtained from the nearly inexhaustible supply of sodium chloride (salt). Its manufacture has a smaller impact than other plastics, produces virtually no dioxins, and relies on fewer oil by-products than rubber. Vinyl is naturally fire retardant, highly recyclable, and products can be easily manufactured to meet strict indoor air quality (IAQ) requirements.

SUPERIOR SANITARY CONDITIONS Lonseal flooring is impermeable to moisture, which prevents it from penetrating to the substrate. This also means any contaminants contained within the moisture stay right on the surface for easier cleaning. Further, commercial installations with proper heat or chemically welded seams and flash coving at the walls helps ensure the install meets the strict sanitary requirements for healthcare or similar settings, eliminating places soiling and contamination are able to collect. For installations where flash coving is not possible, suitable sealants may be applied to prevent moisture intrusion at an installation's perimeter. Select products contain Lonseal's GreenMedic® formulation and a factory-applied urethane finish. When coupled with a suitable maintenance program for its application, your Lonseal flooring can be kept to the highest sanitary standards.

EXCEPTIONAL SURFACE PERFORMANCE While the calendaring method used to create Lonseal flooring allows for versatile designs, it also helps ensure consistency in performance. To improve slip resistance, a variety of textured or embossed surfaces are used, and select products include a factory-applied urethane finish. The layered construction also allows for great wear resistance. These features make our broad line of products suitable to many different applications.

RESILIENT AND DURABLE Lonseal flooring's softness and flexibility do not compromise its performance. It provides superb comfort underfoot, which is beneficial to those who spend a lot of time standing or walking. But it can also endure heavy loads and high traffic, recovering over time and demonstrating its resilience. The frequent healthcare and aircraft applications are great indicators of the flooring's performance in demanding environments.
