A BUOYANT REFURBISHED SEATING MARKET IS EMERGING THAT CAN BRING FINANCIAL, TIME AND ENVIRONMENTAL BENEFITS TO AIRLINES

BETTER THAN THE REAL THING

Introducing the newest addition to Lonseal's range of aircraft flooring: Loncontrail wood effect

The Cirrus Collection by Lonseal comprises a variety of intriguingly realistic wood looks for aircraft flooring. From the intricate grain details to the unique characteristics of real woods, Lonseal develops flooring that is luxurious in style and delivers high performance and quality. The Cirrus Collection provides the timeless beauty of wood that enhances the aesthetic environment in an air cabin space.

Loncontrail is the newest addition to the Cirrus Collection. Loncontrail has the appearance of a natural striated wood, with a thick, combed design. The continuous brushstroke is a soothing effect in the cabin environment, which can be a space of anxiety and stress. Loncontrail creates order in a demanding space and brings in a sense of harmony and balance.

This new sheet vinyl flooring product not only sets the emotions and moods of passengers and visually expands the cabin space, it is also easy to keep clean and maintain. Scuff marks are easily camouflaged and the deceptively smooth surface makes it relatively easy to wipe clean in the event of spills and splashes.

FEATURES (nominal data)

Roll width: 6ft (1.8m)

Roll length: 60ft (18.3m)

Overall thickness: 0.080in (2.0mm)

Wear layer thickness: 0.020in (0.5mm)

Weight: 72oz/sq yd (2,441g/m²)

THE LONCONTRAIL RANGE OFFERS
STYLE AND PRACTICALITY AND IS
AVAILABLE IN FOUR COLORS

The
Loncontrail
flooring range will
officially launch
in summer
2018

Loncontrail is available in four colors, designed to add luxury to the cabin: 9401 Spiced Wine, 9402 Knight's Armor, 9403 Hickory Nut and 9404 Charcoal Blue.

The flooring material also meets key FAA requirements, including FAR 25.853a (12-second vertical flammability test) and FAR 25.793 (factor of sliding friction).

Lonseal became a leading company in the aviation industry leader because of the featherweight nature of its aircraft flooring collections, with Lonseal aircraft flooring claimed to be more than 30% lighter than standard NTF products. The lightweight materials and high strength-to-weight ratio of Lonseal's aircraft flooring ranges mean that they are specified by many aircraft designers and airplane manufacturers. ✕
